

Pedigree Family Chart Information

We're used to seeing family tree charts that look like this:

But once you go back many generations the charts become enormous. For example, my grandfather Albert Wilson's chart would take up the side of a ten story building. So I've turned the family tree charts into pages that can be printed out and taped together as a chart, but I limited it to 20 generations, otherwise they are just too huge.

If you want to print the pages out and make a chart you can figure out how to tape the pages together if you keep the pages in the order in which they printed and look at the borders.

Some of the trees are smaller, so those won't be a problem to figure out.
